

Drone Project - Fourth Engineering Worksheet

This English version is formatted for graduate application review. It preserves the engineering purpose, design decisions, validation evidence, and individual contribution signals of the original course document while presenting the material in concise English.

Applicant	CHENG-HSUAN LEE
Project	Quadcopter Ball-Transfer Drone
Course	Practice of Mechanical Engineering
Document Type	Worksheet
Primary Role	Team lead and final execution planner
Original Source	drone-fourth-project-worksheet.pdf (6 pages)

Executive Summary

This worksheet organized final-stage priorities for the drone project, including final configuration decisions, testing readiness, and improvement planning.

It is useful as evidence of disciplined project closure: what to finish, what to test, what to simplify, and what to leave for a future version.

Applicant Contribution Signals

- Separated final-evaluation needs from future-version ideas.
- Focused the team on validated, executable design choices.
- Documented final readiness and remaining risks.

Worksheet Function

Turn late-stage project uncertainty into a clear final preparation checklist and future improvement record.

Technical Decision Table

Constraint	Decision	Why It Mattered	Skill Demonstrated
Final readiness	Prioritized validated design choices	Protected evaluation performance	Risk management
Future improvements	Recorded next-version ideas	Avoided destabilizing final build	Engineering judgment
Team closure	Clarified final tasks	Improved execution under pressure	Leadership

How to Read This Evidence

This document is intended to help a reviewer quickly understand the engineering content of the original report in English. The original PDF remains available in the project archive as the source artifact with its original figures, tables, screenshots, and course formatting.
